

## **Dexmedetomidine Point of Care Workshop**

to increase its use in practice and facilitate  
opioid sparing analgesia.

**NJANA Members:** Would you like to help  
develop a Dexmedetomidine Point of Care  
Badge Buddy?

**CONSIDER PARTICIPATING IN OUR  
GAP ANALYSIS RESEARCH!**

**SCAN ME**

Seeking clinically active NJANA members to complete a short online qualitative gap analysis survey on current dexmedetomidine use. Data gathered will help develop a dexmedetomidine workshop and implement a point of care badge buddy that will sustain the use of dexmedetomidine in practice to help facilitate opioid sparing affects intraoperative and postoperatively for some patients. Data will be easily accessible by all NJANA members. All data collected will be presented along with the workshop at NJANA Fall virtual Meeting November 7, 2021.

### **PURPOSE:**

*Access the clinical practice and  
usage of dexmedetomidine.*

*Identify knowledge gaps  
in dexmedetomidine use.*

*Provide resources for  
dexmedetomidine usage based  
on survey results.*

### **BENEFITS:**

*Increase dexmedetomidine  
knowledge.*

*Increase comfort level.*

*Improve patient safety and  
outcomes when using  
dexmedetomidine.*
